Corrigendum

In the article Cocchi et al. [1] it was incorrectly stated on p.4 that:

Sanchini et al. collected 18 strains from all over Italy, and showed that the most frequent clone was USA300, but only one of these tested positive for PVL.

The sentence should have read:

Sanchini et al. collected 18 strains from all over Italy, and showed that the most frequent clone was USA300, and all of the CA-MRSA strains tested positive for PVL.
